Models 360ASX-360ASXT

1, 2, or 3Ø – High Performance AC Power Source

6,000VA
15-1,200 Hz

1Ø → 0-330V_{L-N}
2Ø → 0-600V_{L-L}\_2
3Ø → 0-330/572V_{L-L}

Standard Features:

- 1 phase / 3 phase Selectable Output from front panel or bus command. 15 to 1,200 Hz. Operation – 5,000 Hz small signal bandwidth.
- Precision Voltage Programming – 0.05% with Continuous Self-Calibration (CSC) engaged.
- True-RMS metering of volts, amps, and power.
- GPIB (IEEE-488.2) or RS-232 Interface.
- Waveform Library – Arbitrary Waveform Generator.
- 99 stored programs with associated transients for static and dynamic test applications.
- UPC Studio Software Suite.
- UPC Interactive LabVIEW™ Libraries .

Available options:

- Rack enclosures with caster base.
- Programmable Output Impedance.
- Harmonic Analysis and Waveform Synthesis.
- Peak Inrush Capture and Waveform Analysis.
- UPC Test Manager Software Application.
- Wide range of Output transformer options for world-wide testing.

Model 360-ASX

As a member of Pacific’s ASX-Series family of high performance AC Power Sources, the 360ASX offers the low acoustic noise, ease of installation, and maximum power density found in all of Pacific’s high frequency, pulse width modulated AC Power Sources. Control and operational features provide a high degree of versatility and ease for applications ranging from simple, manually controlled frequency conversion to harmonic testing and sophisticated bus programmable transient simulation.

AC TEST POWER

The 360-ASX is equipped with a powerful micro-controller with the ability to operate as a fully integrated test system. It supplies a variety of power conditions and transients to the device under test while metering and analyzing all output performance parameters.

FREQUENCY/VOLTAGE CONVERSION

The 360-ASX is an excellent source of stable AC Voltage over the frequency range of 15 to 1,200 Hz. The output frequency is quartz-crystal stabilized. Output voltages up to 600V are available.

PHASE CONVERSION

With the ability to provide single, two, and three-phase outputs, the 360ASX is an ideal choice to convert three-phase line voltage into precisely controlled split (two-phase) or single-phase output power.

UPC SERIES CONTROLLER

Three controller models are available offering both manual and programmable control. All controllers provide manual operation from the front panel. Programmable Controllers may be operated from the front panel or from a remote interface via RS 232 or GPIB.

The Leader in AC Power Technology

An early pioneer in the development solid-state power conversion equipment, Pacific Power Source continues to develop, manufacture, and market both linear and high-performance PWM AC Power Sources. Pacific’s reputation as a market and technology leader is best demonstrated by its continuing investments in both research and development and world-wide customer support. With corporate owned offices in the United States, Germany, the United Kingdom, and China, local personalized support is always available.

---

UPC Manager Software Suite

Master the Power of the Wave!

UPC Manager Software gives you the tools necessary to quickly and easily operate your AC Power Source. With our graphical interface control all areas of your AC Power Source testing with simple presets, user prompts, test sequences, test plans and custom reports.
# Output Ratings

### Notes:
1. Rated output power is based on a combination of nominal output voltage, rated current and load power factor. Values stated represent the maximum capabilities of a given model. Consult factory for assistance in determining specific unit capabilities as they might apply to your application.
2. Unit is operable as single phase with dual range capability or as a three phase. Output voltage range and 1/3 conversions are selected by front panel or bus commands.
3. V<sub>max</sub> is output voltage with nominal input and full rated load applied.
4. Available current will vary with output voltage and power factor.
5. Source rated at 4kVA in 2Ø mode.

* Power Source equipped with soft start feature. In-rush current at application of input power will not exceed recommended input service.

### Power Factor Rating Curves

**Rated Continuous load current as a function of Power Factor and Output Voltage—Nominal Input Line**

#### Single Phase Mode

![Power Factor Rating Curve Single Phase Mode](image)

**Output Voltage - AC Volts RMS**

Short term overloads to 60A are permitted. Operating time before thermal shutdown or circuit breaker trip varies from seconds to several minutes depending upon line and temperature conditions.

#### Split and Three Phase Mode

![Power Factor Rating Curve Split and Three Phase Mode](image)

**Output Voltage - AC Volts RMS**

Short term overloads to 20A are permitted. Operating time before thermal shutdown or circuit breaker trip varies from seconds to several minutes depending upon line and temperature conditions.
The UPC Controller is a highly versatile one, two, or three phase oscillator/signal generator designed to control any of Pacific’s AC Power Sources. Three controller models, UPC-3M, UPC-3, or UPC-32 are offered for use with the 360ASX.

Using the front panel keyboard and display, all controller models provide for selection of power source output mode, coupling, voltage, and frequency. Selecting the correct UPC controller for a given application varies with your test requirement, desired features, and price.

Both the UPC-3 and UPC-32 Controllers are available with either RS-232 or GPIB remote interface. Commands are structured in accordance with SCPI (Standard Commands for Programmable Instruments).

360ASX-360ASXT

General/Environmental

Temperature:
- Operating: 0° to 55°C
- Storage: -10° to 70°C

Humidity:
- 0 - 95%, Non-condensing

Cooling:
- Front and side forced air intake (300 CFM) with rear exhaust. Automatic Fan Speed Control for low acoustic noise and extended fan life.

Altitude:
- Operating: 6,500 Ft (1,981m)
- Storage: 40,000 Ft (12,192 m)

Heat Dissipation:
- 2.5kBTU/ hr (Full kW Load)

Audible Noise:
- Variable speed fans
- 65 dba Max @ 1 Meter

Agency Approvals:
- Safety UL 61010-1
- EN 61010-1
- EMC EN 61326-1

Protection and Safety

Hardware
- Over-current, short circuit, over-temperature

Programmable Current Limit
- A single RMS programmed, average responding, value provided for all phases. Limits current by reducing output voltage.

Programmable Current Protect
- Allows the power source to operate in "constant voltage" mode, interrupting output when specified current protect limit is exceeded.

Mechanical Specifications

Height
- 360ASX: 5U (8.75", 222mm)
- Transformer Module: 3U (5.25", 133mm)

Depth
- 360ASX: 23.12" (587mm)
- Transformer Module: 23.5" (597mm)

Weight
- 360ASX: 145 lbs (66kg)
- Transformer Module: 125 lbs (56.8 kg)

Mounting
- Standard 19" rack (483mm). Cabinet options available.

Hardware Options

/M7073
- Safety Interlock Normally Open Contacts

/M99413
- Safety Interlock Normally Closed Contacts

/P000828
- 15U rack enclosure, heavy duty vertical cabinet with casters and rear screen. Ordered as separate line item.

/MXXXXX
- Other factory specified modification

Software/Firmware Options

/S
- RS-232 Interface, 38.4 KBps (std UPC-3)

/G
- GPIB Interface, IEEE-488.2, (std UPC-32)

/Prog-2
- Programmable Output Impedance (not available with UPCxM)

/HAS
- Harmonic Analysis and Synthesis (not available with UPCxM)

/IR
- In-Rush Meter. Capture and view peak in-rush current values via front panel or remote interface (UPC-3 only).

Test MGR
- UPC Test Manager License: Create, edit, and execute Test sequences and reports. Ordered as separate line item.

Test SEQ
- Avionics test sequences; DO-160, ABD-0100, ABD-0100 (A350), Ordered as separate line item, Requires 'Test' Manager License.
